

Dzaki Fadhlurrohman

Frontend Developer

fadh.dzaki@gmail.com dzakifadh.dev South Jakarta, Indonesia (GMT+7)

Frontend developer with 5+ years of experience shipping production React and Astro applications, working fully remote since 2021. Focused on turning designs into interfaces that hold up under real use: data-heavy dashboards, e-commerce storefronts, and marketing sites for clients across Indonesia and abroad.

WORK EXPERIENCE

Frontend Developer · Nortale LLC

Jan 2022 - Present

Full-time · Marketing & Advertising

Turn product and marketing designs into interfaces that hold up across browsers and devices, working closely with UI designers.

- Turned UI/UX designs into responsive interfaces that matched the source files down to the pixel
- Worked daily with designers and backend engineers in a fully remote setup
- Tested across browsers and devices to catch inconsistencies before users did
- Shipped several production applications now in daily use by Nortale's clients

Frontend Developer · SIMPUSKAPA

Mar 2023 - Mar 2025

Freelance · Research Center and Advocacy Group

Built the dashboards Puskapa runs its vendor, project, employee, and finance operations on.

- Built the frontend in React and TypeScript, with performance as a priority on data-heavy screens
- Shipped internal tools for managing vendors, employee records, and financial data
- Designed dashboards with filtering, pagination, and export built in from the start
- Set up role-based access so each user type saw only what their role needed
- Built multi-step forms that validate as you go, not just on submit

Frontend Developer · Good City Foundation

Mar 2022 - Jul 2023

Part-time · Non-profit Multilateral Development Organization

Improved the UI of internal systems and maintained web app interfaces used by partner organizations.

- Rebuilt dated legacy screens so staff could get through them quickly
- Built dashboards shared between internal staff and partner organizations
- Kept the experience consistent across two very different audiences: staff and outside partners

Web Developer · Barudak Visual

Mar 2021 - May 2021

Internship · Illustration & Icon Design Studio

Built the studio's company profile site from a design brief, with custom animation work throughout.

- Turned a static design brief into a fully built site with custom animation work
- Delivered the project independently over a three-month internship

Junior Web Developer · Maghozi Studio

Feb 2019 - Feb 2020

Part-time · Creative Agency

Handled client web projects end to end, mostly company profile sites and landing pages.

- Worked directly with clients to turn their requirements into finished sites
- Led each project from initial planning through deployment

PROJECTS

WOBL Creative: Studio Platform

Jun 2026 - Aug 2026

WOBL Creative · Freelance

Marketing site, CMS dashboard, and API for WOBL Creative, a design studio in Java and Bali. Astro on the front, React Router for the CMS, and Hono on Cloudflare Workers behind both.

- Built the Astro marketing site static-first, with two content sources: a live CMS API and a local Markdown collection
- Built a React Router CMS dashboard for editing projects, tags, categories, and contact submissions without touching code
- Built the Hono API on Cloudflare Workers with a Postgres/Drizzle backend, serving both the CMS and the public site

Asset Inventory System

Jun 2026 - Jul 2026

KB IT Rabbani Kendal · Freelance

A staff dashboard and its backing service for a kindergarten in Kendal, replacing a paper asset ledger with searchable records, lending logs, and purchase requests.

- Modeled assets in a hierarchy (category, type, group, item), with custom fields per group
- Built a lending log and a purchase-request workflow with priority-based review
- Gave staff role-based accounts and printable, audit-ready reports pulled from live data

Online Psychological Assessment Platform

Oct 2025 - Jul 2026

Biro Psikologi Nurani · Freelance

A testing platform for an Indonesian psychology clinic. Participants join with an activation code and take webcam-proctored tests; staff export the results as PDF, DOCX, or Excel reports.

- Added webcam proctoring that captures participants at set checkpoints to confirm identity through a session
- Chained multiple test modules into a single session, each with its own timing
- Built report generation in PDF, DOCX, and Excel, both per participant and in bulk by module or client

Zentry: Fintech SaaS Landing

Apr 2026 - May 2026

Concept project · Personal

A concept marketing site for a fictional fintech product: 19 routes in Astro, with GSAP scroll animations on top of Lenis smooth scroll.

- Built dynamic routes for blog, FAQ, and integrations driven by content collections, including 17 FAQ entries across categories
- Built an animation system of 10 GSAP-driven cards and visuals, layered under Lenis smooth scroll
- Kept the site static-first, with React islands only for the navbar, FAQ, blog filter, and plan comparison

Youmaywear

Sep 2025

Private client · Freelance

An online store built from the owner's requirements, with a video hero, a horizontal-scroll gallery, variant selection, and a cart that persists between visits.

- Designed an animated storefront with a full-height video hero and a horizontal-scroll gallery
- Built an interactive product catalog with variant selection and real-time USD/IDR pricing
- Added a persistent cart with instant add, remove, and quantity updates across sessions

SIMPUSKAPA · PUSKAPA

Mar 2023 - Mar 2025

An internal management system that moved Puskapa's project, procurement, finance, and HR work off spreadsheets and onto one platform.

BESDAF · Private client

Apr 2023

A personal profile site for a client, built from their brief.

Artotel · Capital Six

Mar 2023

A hotel brand's company profile site built from a Figma design, with interface animation matched to the original prototype.

Logofonts & Runselltype · Runsell Studio

Oct 2021 - Dec 2021, Jul 2022

A font e-commerce store covering storefront, admin panel, license management, PayPal checkout, and email templates.

Marco Project · Outsource

Jun 2021 - Aug 2021

Over 60 pages built from Figma designs into production HTML and CSS, with Gulp for the build.

VOLUNTEER EXPERIENCE

Kafila Tahfidz

Apr 2022 - Mar 2023

Kafila International Islamic School · Volunteer

An internal dashboard for dormitory, tahfidz, HR, and student management, with the dormitory and Quran-examination modules rebuilt from scratch.

- Rebuilt the dormitory and Quran-examination tracking modules from the ground up
- Added new features on top of the existing system without disrupting how staff already worked

CORE SKILLS

TypeScript, JavaScript, React, Next.js, Remix, Astro, Tailwind CSS, GSAP, Sass, Playwright, Git

EDUCATION

Bachelor of Technology, Informatics Engineering

Dec 2018 - Mar 2022

Muhammadiyah University of Surakarta
